Amendment to Land Development Regulations		\$1,500.00	
Application for Subdivision Plat Approval	\$1,000.00 or \$25.00 per lot, whichever is greater (LDC final plat approval)	\$1,000.00 min.	
Application for Special Exception		\$1,000.00	
Variance		\$350.00	
Other Conditional Uses		\$2,000.00	
Special Temporary Use Permit	Issued by Commission	\$200.00	
Special Temporary Use Permit	Issued by Staff/Clerk	\$50.00	
Miscellaneous			
Decks and Ramps		\$100.00	
Porch, Covered Patio or Attached Carport	Roofed with open sides, attached to a dwelling	\$125.00	
Screening an Existing Covered Porch	Screen only, no structural change	\$50.00	
Sign Permit		\$100.00	
Swimming Pool	All Sizes	\$100.00	
Conditional Land Use	Communication Tower — \$3,500.00 non-refundable application fee, plus a \$3,000.00 refundable consultant escrow deposit (LDC 8.5, 8.6)	\$3,500.00 plus \$3,000.00 escrow	
Conditional Land Use	Co-Location on Existing Tower — \$2,000.00 non-refundable (LDC 8.6)	\$2,000.00	
Single-Family Small Project Exemption (HB 803)	Strictly cosmetic / non-structural work on a single-family home, total declared value under \$7,500	No permit required / No fee	Effective July 1, 2026. Does NOT apply to electrical, plumbing, mechanical, gas, or structural work, or in a designated flood hazard area.
Inspections			
Additional Inspection	Any inspection beyond those included with the permit — added or altered work, a partial inspection, or an inspection requested out of sequence	\$50.00	
Re-Inspection	Each re-inspection after the first, where work failed or was not ready at the scheduled time	\$50.00	
Additional permit rules			
Plan Review: Plan review is included in the building permit fee. No separate plan review fee is charged.			
Third Party Inspection: 40% discount on the permit fee.			
Permit Expiration: A building permit expires one year from the date of issuance. No renewal fee is charged.			
Permit Extension: An expiration date may be extended upon written request to the Building Department. No fee.			
Private Provider (s. 553.791, F.S.): Statutory minimum fee reduction when a private provider performs plan review or inspection - at least 25% off for either, at least 50% off when both are used. This is a statutory minimum, not a county discount.			

Description of Services	Unit / Details	2026 Fee	Notes
Factory-Built (Modular) Buildings: The reduced per-square-foot rate applies only where the building bears a valid State of Florida insignia and local review is limited by s. 553.80(1)(d), F.S. to erection, assembly, and construction at the site. Foundation and anchoring plans sealed by a Florida-licensed Professional Engineer are required. Electrical, plumbing, mechanical, and site plan review are charged separately at the rates in this schedule. A pre-engineered metal or aluminum building supplied as a kit or as components, with no state insignia, is NOT a factory-built building - it is reviewed and inspected as conventional construction and charged the standard Commercial Building Permit rate.			
Electrical - Interior Wiring: The interior wiring rates apply only where the existing service, meter, and panel are unchanged. If any of those is replaced or increased in size, the new service / service upgrade fee applies instead. Whether an existing service is adequate for the new use is determined by the licensed electrical contractor's load calculation, not by the applicant's preference.			
Accessory Building: Covers any non-dwelling accessory structure regardless of construction method or material - pole barns and post-frame buildings, metal or steel-frame barns, aluminum buildings, equipment sheds, carports, shops, workshops, and lean-tos. The fee is set by whether the structure is open or enclosed, not by what it is built from. A structure that will be lived in is NOT an accessory building: a pole barn house, barndominium, or similar building used as a residence is permitted as new residential construction at the residential per-square-foot rate.			
Enclosing an Existing Open Structure: The modification fee applies only where the open structure was previously permitted. If it was never permitted, the Accessory Building - Enclosed fee applies instead. Enclosing changes the structure's enclosure classification for wind design, so a plan review and inspection are required.			
Porches: A roofed porch, covered patio or attached carport is charged the flat porch fee regardless of size. An uncovered deck, patio, steps or ramp is charged the Decks and Ramps fee. Enclosing a porch as heated living space is charged at the residential per-square-foot rate, because it becomes living area. A covered porch counts toward the required yard setbacks, while an uncovered deck, steps or balcony does not, so adding a roof over an existing deck needs a setback check first.			
Inspection Fees: The first re-inspection is not charged. Re-inspection and additional inspection fees must be paid before the inspection is scheduled. An additional inspection is one beyond the inspections included with the permit type.			
Land Development Code Fees: Several fees are set by the Land Development Code rather than by this schedule - mobile home park plan review (LDC 4.6-1), final plat approval (LDC 5.7), and communication tower fees (LDC 8.5 and 8.6). Where the Code sets a fee, the Code controls. This schedule reproduces those figures for convenience only.			
Communication Tower Security: In addition to the application fee and escrow deposit, the applicant and the property owner must jointly file a bond or other acceptable security of at least \$75,000.00 to assure performance (LDC 8.7). This is security, not a fee, and is not collected as revenue.			
Penalty: Double fee if work is started before the permit is pulled.			
HB 803 Exemption: A single-family homeowner is exempt from permit requirements for strictly cosmetic, non-structural work (flooring, cabinets, painting, drywall finishing) with a total declared value under \$7,500. The exemption does NOT apply to electrical, plumbing, mechanical, gas, or structural work regardless of value, and is VOID if the property is in a designated flood hazard area. Splitting a project to stay under the threshold is prohibited. The applicant must submit a signed Written Request for Exemption (HB 803) before work begins. Effective July 1, 2026.			
HB 803 - Temporary Hurricane / Flood Walls: A separate exemption with NO dollar threshold. Installation of a temporary residential hurricane or flood wall meeting the specified standards requires no permit. Confirm the applicable standard with the Building Official before waiving a permit.			
HB 589 - Septic Systems: A separate construction permit shall not be required for a septic system when a building permit has been issued for the same single-family residence. Effective immediately.			
HB 927 - Private Professional Plan Review: Applicants may elect to use a county-preapproved private professional for plan review. The county charges no separate plan review fee, so no county review fee is due either way; the applicant is responsible for all fees charged by the private professional. County retains final approval authority. 45-day review timeline applies; automatic approval issued if no county action taken within 10 days of completion notice. Program must be in place by January 1, 2027.
